ACHIEVE MORE IN LESS TIME WITH SELFLIGATING BRACKETSYSTEMS

Selfligating brackets have long been established as the gold standard in orthodontic appliances. When combined with the straightwire technique it has proven to be one of the most successful appliances ever. But still not everyone is using them. Why is that: Is it a cost factor? Is there anything wrong with the old system? In this lecture we will discuss the basic concepts of the straightwire technique. You will learn all the pros and cons of selfligating brackets. Dr. Baxmann will explain the biomechanic concepts of friction and binding. You will be amazed how your treatment can

be improved and facilitated by optimized archwire sequences, clever anchorage planning and more economic appointment scheduling. Dr. Baxmann's LeanOrthodontics® is one of the top success systems in efficient orthodontic treatment. And selfligating brackets play a major role within this system. Follow the step by step guide of Dr. Baxmann's method. Apply Dr. Baxmann's Cookbook®. They will help you to achieve better results while seeing more patients than before with less effort. You surely never want to go back to the old system.

Be more efficient and effective, save time and money with selfligating brackets.

SPEAKER

DR. MARTIN BAXMANN

Dr. Martin Baxmann is CEO and founder of Orthodentix, a group of five clinics specialized in orthodontic treatment and MyOrthoLab which delivers specialized orthodontic laboratory services all over Europe. He has developed various orthodontic appliances, instruments and tools for radiographic diagnoses and case planning. Dr. Baxmann has published several scientific articles and lectures regularly worldwide. Martin is well-known for his good dry sense of humor and his capability to explain even the most complex contexts in simple and understandable ways.
